

PROFESSIONAL SUMMARY

Motivated B.Tech undergraduate with hands-on experience in Full Stack Web Development, specializing in React.js, Node.js, Express.js, MongoDB, MySQL, and FastAPI. Skilled in designing, developing, and deploying responsive web applications, RESTful APIs, authentication systems, and database-driven solutions. Experienced in building end-to-end projects, integrating frontend and backend services, and implementing modern development practices. Proficient in JavaScript, Python, Java, Git, and version control workflows. Strong understanding of web application architecture, API integration, database management, and software development life cycle. Demonstrated ability to quickly learn new technologies, solve complex problems, and deliver high-quality solutions through academic and personal projects. Passionate about creating scalable, user-centric applications and contributing effectively in collaborative, fast-paced, and innovation-driven environments.

TECHNICAL SKILLS

Programming & Development: Python, Java, JavaScript, Flask, React.js, Node.js, Express.js, SQL, MongoDB, RESTful APIs, Backend Development, Frontend Development, Full Stack Development

DevOps & Cloud: Docker, AWS , CI/CD, GitHub Actions, Deployment & Hosting

Database Management: MySQL, MongoDB, Database Design, Query Optimization

Frontend & Backend Technologies: HTML5, CSS3, JavaScript , React.js, Tailwind CSS, Responsive Web Design, Flask, Node.js, Express.js, REST API Development, Authentication & Authorization

Machine Learning & AI: ML Fundamentals, Deep Learning, Model Building & Deployment, Computer Vision

Version Control & Tools: Git, GitHub

PROJECTS

FreshScan – AI-Powered Fruit Freshness Detection Platform| FastAPI, MongoDB, JavaScript, Cloudinary, Swin Transformer

- Architected and trained a Transformer-based image classification pipeline to detect fruit freshness from visual features — directly exercising the deep learning and LLM-adjacent model knowledge required for production AI systems.
- Built a FastAPI/Flask backend supporting authentication, image uploads, preprocessing, and real-time model inference through RESTful APIs., and real-time model inference, demonstrating full end-to-end Python AI pipeline ownership from data ingestion to response delivery.
- Applied advanced OpenCV preprocessing (normalization, augmentation, lighting correction) to improve model generalization across large, diverse real-world datasets — a pattern transferable to medical image and document understanding tasks.
- Integrated the ML inference backend with a web interface, shipping a complete working AI product and demonstrating ability to navigate unfamiliar codebases and production AI edge cases

[GitHub](#)

ExamPrep AI – RAG-Based Study Assistant | React, TypeScript, FastAPI, LangChain, Sentence Transformers, Gemini 2.5 Flash

- Built a full-stack Retrieval-Augmented Generation (RAG) application enabling students to interact with uploaded PDFs through AIpowered chat, MCQ generation, quizzes, flashcards, summaries, and important question extraction.
- Designed a semantic retrieval pipeline using PyPDF, LangChain text chunking, all-MiniLM-L6-v2 embeddings, and a local FAISS vector store to provide low-latency document search and context retrieval.
- Implemented context-grounded question answering with Google Gemini 2.5 Flash, reducing hallucinations by augmenting prompts with the top relevant document chunks and generating responses with page citations.
- Developed REST APIs using FastAPI, SQLAlchemy, JWT authentication, and SQLite while managing user documents, chat history, quiz results, and study sessions through a modular backend architecture.
- Engineered adaptive learning modules including automatic quiz generation, active-recall flashcards, score analytics, and AIpowered summarization, creating a personalized exam preparation platform.

EDUCATION

Degree	Specialization	Institute	Year
B.Tech	CSE(Cyber Security)	Keshav Memorial (KMCE)	2023–Present
Intermediate	MPC	Sri Chaitanya	2023
SSC		Sri Chaitanya School	2021

CERTIFICATIONS

Meta Front-End Development | Coursera

- Gained foundational knowledge of modern front-end web development.
- Learned HTML5, CSS3, JavaScript, Responsive Design, and React fundamentals.
- Developed skills in building interactive and user-friendly web applications.

100 days of Code: The Complete Python Pro Bootcamp | Udemy

- Completed 56.5 hours of hands-on Python programming training.
- Learned object-oriented programming, data structures, APIs, automation, web development, and software engineering concepts
- Built practical projects to strengthen problem-solving and programming skills.

SQL Advanced Certification | HackerRank

- Demonstrated advanced SQL querying skills.
- Worked with joins, subqueries, aggregate functions, views, and database optimization techniques.

Cyber Security Workshop | JNTUH University College of Engineering, Hyderabad

- Successfully participated in a Cyber Security Workshop organized by JNTUH University College of Engineering.
- Gained practical exposure to cybersecurity fundamentals, ethical hacking concepts, network security, and cyber threat analysis.

LANGUAGES KNOWN

- English, Telugu, Hindi
